

# TOWARDS A NEW SOCIAL STRUCTURE BASED ON THE HUMAN BEING

For almost two centuries now we've been experiencing the dramatic consequences of the juggling of governmental structures – capitalism, communism, socialism, democracy – to which the human being, still unknown in its essence, must adapt to and perform out of.

## HOW TO FIND A SOCIAL STRUCTURE THAT SUPPORTS THE PERSONAL AND SOCIAL STRIVING OF ITS CITIZENS?

To improve this situation is a challenge, an obligation, a great opportunity to bring consciousness into the real nature of the human being!

## BEYOND EGOTISM - IN BETWEEN US

The most popular basic government structure in the modern world, **democracy**, is characterized by the use of the principle of the **equality** of its citizens in dealing with social life issues. This **equality** is also the basis of the law which, consequently and theoretically, are applied **equally** to all citizens. Democracies, and any other type of social structure, are then correct in using the **equality** principle when dealing with legal-rights issues.

Our present political situation shows how these **democratic** governments, in acting solely under this principle of **equality**, are unaware as to how the different social issues relate to the human essence and can turn **democracies** into **bureaucratic tyrannies**.

A healthy social structure will realize the need to create a separate and self-managed social entity, an **ECONOMIC ORGAN**, to deal with them.

## WHICH OTHER ISSUES, APART FROM LEGAL ONES, ARISE IN OUR LIVES?

"It is not the function of government to keep the citizen from falling into error; it is the function of the citizen to keep the government from falling into error." Robert H. Jackson (judge).

## HEALTHY EGOTISM - ME WITHIN US

In social life issues arise that can only be dealt with correctly under the notion of **human freedom**, humans' inner urge to take responsibility for themselves and for supporting others to do the same. These are issues related to citizens' ways of thinking, to their cultural and spiritual needs, embracing all types of arts including the art of education, medicine and judiciary, plus to all issues connected with religion and scientific paths.

A healthy social structure will realise the need to create a separate and self-managed social entity, a **CULTURAL ORGAN**, to deal with these issues.

## CORRUPTED EGOTISM vs US WITHIN ME

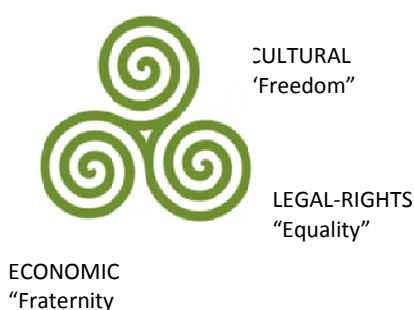

Other types of social life issues can only be dealt with correctly under the principle of **fraternity** between citizens. These issues deal with human physical needs and all living expenses. Here the human being depends primarily on the riches of the Earth, making it a member of a global society. For this to be healthy we need to develop an eye for **observing each other's needs** and the capacity for sharing the goods accordingly.

A healthy social structure will realize the need to create a separate and self-managed social entity, an **ECONOMIC ORGAN**, to deal with them.

## THREEFOLD GOVERNANCE

If we were to apply the principle of **fraternity** of the citizens to issues pertaining to human **freedom**, it would result in an unhealthy, troubled social life, common error of the **communist** and **socialist** governments. On the other hand if the principle of human **freedom** were applied to issues pertaining to human **fraternity** it would result in another type of unhealthy and troubled social life, common error of **liberal** and **capitalist** governments.

The separate governances, **legal**, **cultural** and **economic** of a healthy social structure will develop a proper way to interrelate. This relation is fundamental and will create, for each community, a distinctive, unique dynamic structure based on the inner nature of its citizens.

## HUMAN ORGANISM

Under this three-fold structure our social life will be an image of the human being, an outer expression of our inner activities as thinkers, feeling beings and doers, which, in the human body, have their separate seats in each of its three organic systems: **nervous system** (head and senses)-thinking, **rhythmical system** (heart and lungs-feeling and **motor-metabolic system** (digestive organs and limbs)-doing. These systems must relate in the proper way to each other in order to keep the human body healthy.

## WORKING OUT SOCIAL ISSUES

The social issues presented **below** are a call to observe and understand our **current social struggle** and to identify solutions starting by placing each issue in the correct social organ. Please engage yourselves in similar explorations on the many themes that frequently come into **citizens' awareness** and that do, or do not, follow the three-governance structure. Working in groups helps to see those issues from different angles and enables a richer understanding and a stronger path of action. Become a **responsible citizen** - society needs each one of us! Learn, participate and help to create a healthier social life!

Only citizens' understanding, courage and commitment will turn these human ideals into a living reality.

## BASIC STRUCTURE OF EACH ORGAN OF THE THREEFOLD GOVERNANCE

**RIGHTS** National independent democracies-negotiation between equal parties

**CULTURAL** Associations of independent free citizens-growing in understanding

**ECONOMIC** Free associations of consumers, producers and traders-observing and meeting the real needs of people

## PLEASE COME ALONG TO THE MANIFESTO PERFORMANCE TO ENJOY SOME CULTURE BORN OUT OF SOCIAL STRUGGLE!!

The intention of the manifesto is for social kindred spirits to get together and start the long exploration necessary towards a future implementation of a threefold social structure based on the real nature of the human being.

Maria Hoffmann

The ideals of the French Revolution **FREEDOM, EQUALITY, FRATERNITY** will then be realised separately in each of these social organs. Human society based on the nature of the human being is a "one that is three".

1. CITIZENS AS ROOTS OF THE SOCIAL CHANGE - CULTURAL

*“Consciousness of one’s spiritual nature, of being rooted in a spiritual world, was what got lost in the transition to a scientific mode of thinking”. (R. Steiner, Towards Social Renewal)*

*“We cannot solve our problems with the same **thinking** we used when we created them.”  
- **Albert Einstein***

*“One question, above all, stands out before us today in letters of flame.  
How must the human mind be changed in order that it might learn to master the social quest?” R.Steiner, The Social Future*

*“The mind is not a vessel to be filled but a fire to be kindled” Plutarch*

The ‘legal’ organ will support, the decisions taken by the ‘cultural’ and ‘economic’ organs. The ‘economic’ organ will provide gift money to the ‘cultural’ in appreciation for the increased creativity of the citizens.

**“... the realm otherwise dealt with only by the artist in imagination must now become the serious concern of the human race ...”**  
**Rudolf Steiner re. *Philosophy of Freedom***

Note: We call here Spirit our human capacity to participate consciously in our human soul activities of thinking, feeling and doing making us responsible for them.

2. EDUCATION IN FREEDOM - CULTURAL

*“Wherever is found what is called a paternal government, there is found state education. It has been discovered that the best way to insure implicit obedience is to commence tyranny in the nursery” Benjamin Disraeli*

*“It is a miracle that curiosity survives formal education” Albert Einstein*

*“The more subsidized it is, the less free it is. What is known as “free education” is the least free of all, for it is a state-owned institution; it is socialized education - just like socialized medicine or the socialised post office - and cannot possibly be separated from political control”. Frank Chodorov*

*“..... in matters of education “the interest of the consumer is not only an efficient guarantee for the goodness of the things consumed, but the best guarantee.” Herbert Spencer*

The unconditional compulsory or free economical contribution-in short gift-coming mainly from the ‘economical’ organ, to the educational institutions would be based on the number of free citizens supporting it. Variety and freedom of education would take place.

*Are the national armed services, the national school curriculum and national public health based on the nature of the human being?*

3. FREEDOM IN HEALTH - CULTURAL

*“Is it possible to gain a knowledge of health and disease only by those methods of research which concern the physical body; purely with the assistance of the senses and the reason, or by the use of instruments which extend the faculties of the senses and enable us to carry out experiments?...a real historical retrospect shows us that the knowledge which mankind has gained originated from something totally different from these mere sense-observations. There lies behind us an immense development of our spiritual life, no less than of our physical.....During the course of centuries a vast store of external knowledge has been accumulated in the domain of biology, physiology, and other branches of research which are introductory to the study of medicine.... But during these centuries all knowledge connected with man which could not be gained without spiritual vision, sank completely out of sight. It has therefore become actually impossible to investigate the true nature of health and disease”.  
Rudolf Steiner*

The ‘legal’ organ will only give ‘equal’ support and access to all types of healing systems accepted by the citizens.

*What is the similarity between Falung Gong persecution in China and the Compulsory Vaccination Bill 2015 in Australia?*

4. WORK AS A VOLUNTARY DEED - ENDING OF PAID LABOUR -LEGAL

*“They deem me mad because I will not sell my days for gold; and I deem them mad because they think my days have a price.....No man can draw the line between necessities and luxuries.....You owe more than gold to him who serves you. Give him of your heart or serve him” Kahlil Gibran*

*“When people are no longer recompensed for their work, then money will lose its value as a means for acquiring power over work. There is no other way of overcoming the misuse that has been perpetrated with mere money than by forming a social structure in such a way that no one is recompensed for his or her work, and that the provision of the means of existence comes from an entirely different source. It will then naturally be impossible to use money for the purpose of compelling anyone to work....”Rudolf Steiner (Challenge of the Times)*

Labour’s main goal is the sharing of skills to fulfil social needs. To participate in labour is a human right independent of any wages. Due to the present-day increase of the division between rich and poor it will be necessary a law establishing a basic income that will see all citizens living in dignified conditions and able to keep serving each other through their labour. Corporations will be under strict legislation to provide for this basic income through gifts or taxes. Legislation will also be needed for the allocation of capital to those who have the ability to use it (not to be inherited).

5. PEACE TAXES - LEGAL

*“Make wars unprofitable and you make them impossible” A. Philip Randolph*

*“War means blind obedience, unthinking stupidity, brutish callousness, wanton destruction and irresponsible murder”. A. Berkman*

*“Peace can’t be kept by force. It can only be achieved by understanding.....It is my conviction that killing under the cloak of war is nothing but an act of murder”  
Albert Einstein*

This organ will be constantly supporting national and international peace, legislating for an organized system engaged in keeping peace at all cost. If war is needed out of real danger for the citizens, these will be encouraged to participate. Any desire for power leading to a call for war will be under strict legislative control. Under this structure no economical, neither cultural pressures could distort the independent ‘legal’ organ engaged in keeping peace.

*“The understanding of the real nature (of the human being) of body, soul and spirit will lead to a human social order based on freedom, equality and fraternity.  
Freedom- Spirit-imbued individual will be free individuals  
Equality- Souls receptive to spirit perceive and treat other souls they encounter in life as equals in a great mystery  
Fraternity- natural practice of bodies ennobled by spirit and soul.” RUDOLF STEINER*

6. FREEDOM OF EXPRESSION - CULTURAL

*“The Iraq War was the biggest issue for people of my generation in the West. It was also the clearest case, in my living memory, of media manipulation and the creation of a war through ignorance. .... I saw that publishing all over the world was deeply constrained by self-censorship, economics and political censorship, while the military-industrial complex was growing at a tremendous rate, and the amount of information that it was collecting about all of us vastly exceeded the public imagination.”  
Julian Assange*

*“... so long as the media are in corporate hands, the task of social change will be vastly more difficult, if not impossible ...” Robert Machesney, journalist and author*

*“There is no such thing, at this date of the world's history, in America, as an independent press. The business of the journalists is to destroy the truth, to lie outright, to pervert, to vilify, to fawn at the feet of mammon, and to sell his country and his race for his daily bread. We are the tools and vassals of rich men behind the scenes. We are the jumping jacks, they pull the strings and we dance. Our talents, our possibilities and our lives are all the property of other men. We are intellectual prostitutes. “John Swinton, Chief of Staff New York Times at New York Press Club, 1953*

*When are censorship and police control acting correctly?*

7. ENDING THE PRIVATISATION OF LAND ECONOMICAL

8. ENDING THE MANIPULATION OF NEEDS ECONOMICAL

9. ENDING THE SEARCH FOR THE CHEAPEST PRICE -----ECONOMICAL

10. ENDING THE NEED TO BECOME A REFUGEE LEGAL

11. ENDING OF TAXES ON INCOME – LEGAL

12. ENDING OF CITIZENS’ DEBT – THREE ORGANS

13. REGULATION OF SOCIAL OFFENCES- LEGAL
